

Fax: President Obama, U.S. Senators & U.S. House of Representatives

“The Science is Indeed Settled - CO₂ is not Causing Global Warming!”

President Barack Obama in an address to the United Nations General Assembly said, “The danger posed by climate change cannot be denied, and our responsibility to meet it must not be deferred!” The President apparently bought into the Gore scam of CO₂ causing global warming. However, as shown below there is absolutely no correlation between increasing CO₂ and the earth’s temperature. Since 1998, the earth’s temperature has dropped some 0.6 °C (~ 1 °F) while CO₂ increased by 20 ppmv.

Man’s activities only account for 2.9% of the total CO₂ emitted to the atmosphere and nature absorbs 98.5% of all CO₂ released by man and nature. Nature has its environment under control already. If we completely eliminated all global man-made CO₂ (11 ppmv) from the atmosphere tomorrow we would go back to the level we had in January 2003. It was some 0.5 °C warmer in January 2003 than it was in January 2008!”

To call carbon dioxide a pollutant is like calling oxygen a pollutant because if you bury CO₂ you also reduce O₂ concentration in the atmosphere through reduced photosynthesis. For every 1000 tons of CO₂ man sequesters, 727 tons of oxygen are deprived from us, our children and pets and 272 tons of carbon are sequestered. In addition, plant growth is reduced by 1042 tons, taking food away from the We the People

Reduction in carbon emissions will cost us dearly both in increased price of energy and also loss of jobs to other countries. It will further yield a detrimental rather than beneficial effect on our climate!

Kindest Regards,
