

My email of 15 December 2007, based on this article:

Sceptical Scientists Kicked Off UN Press Schedule in Bali ... Again

<http://www.globalwarmingheartland.org/article.cfm?artId=22485> December 13, 2007

My comments:

Worse then communism ever was - there you *knew* you were not allowed freedom of speech and freedom of thought.

This is why the man-made global warming issue really is a scam and the behaviour of the UN is quite unacceptable.

What are they afraid of: real science?

Somehow, we have ended up with green terrorism, with Greenpeace and Friends of the Earth complicit.

All of you who go along with this scam should be deeply ashamed of yourselves.

Without tackling population increases, what is the point of reducing a bit of carbon dioxide?

How much do you plan to cut: 1,000 Gigatons (in your dreams, but hey!).

Well, that represents exactly 0.0333 percent of the total amount of carbon dioxide in our atmosphere. *(The figures in my original email were incorrect, sorry!)*

All at a cost of billions of dollars without any effect whatsoever on the climate.

HOW BLIND ARE YOU TO THESE SIMPLE FACTS?
