## **Vote No on Carbon Taxes**

### **Global Warming from CO<sub>2</sub> is a Global Scam**

I am a chemical engineer who analyzed global warming like I have a lot of other data. Never before have I evaluated a scientific premise wherein I found absolutely no empirical (real measurements) data to back it up. Science to me is a search for truth and truth alone. There is no truth to CO<sub>2</sub> causing warming. In my opinion, Global Warming from CO<sub>2</sub> is the biggest scam ever attempted to be imposed on the people of the world. What is the reason for the scam? Carbon taxes, so a few people can become very wealthy at the expense of the many. The truth will become known by all and the ones that promoted it will of necessity have to run to hiding places, for they will quickly become the most despised people in the world!

The paper below assesses every aspect of the Intergovernmental Panel on Climate Change (IPCC) premise and scientifically debunks each one. The proof the IPCC provides is based only on computer programs they generated; they never use real data to check their predictions.

**[http://www.ilovemycarbondioxide.com/pdf/No\\_Evidence.pdf](http://www.ilovemycarbondioxide.com/pdf/No_Evidence.pdf)**

All of the points below are discussed in the paper:

- 1) Most scientists do not buy into global warming from CO<sub>2</sub>; over 31,000 signed a petition rejecting the Kyoto Global Warming Agreement.
- 2) The earth's temperature and CO<sub>2</sub> concentration do not correlate at all with one another.
- 3) Gore had the cause and effect reversed in his Inconvenient Truth documentary concerning the Vostok Ice Core data. He conveniently separated the graphs of CO<sub>2</sub> concentration and earth temperature so you could not see which came first. A spike from the sun occurs first then CO<sub>2</sub> increases later after the oceans heat up, CO<sub>2</sub> solubility decreases, and more CO<sub>2</sub> is released from the water to the atmosphere.
- 4) Nature absorbs 98.5% of the CO<sub>2</sub> emitted from nature and man's activities and thus effectively regulates the CO<sub>2</sub> in the atmosphere. No need for man to do anything for man's activities account for only 3% of the total - a mouse milk effect!
- 5) There is no greenhouse signature that can be found in the atmosphere as the IPCC predicts.
- 6) The greenhouse effect as described by the IPCC is also thermodynamically impossible. It violates the first and second laws of thermodynamics which in essence say you cannot get more energy out of a system than you put into it.

**There are many lies being perpetrated on We the People; let us not let them get away with lying about global warming so they can impose carbon taxes that will cost us all dearly but yield absolutely no good effect on our climate! Please contact Jim Inhofe (Senator- OK) who understands the fallacy of CO<sub>2</sub> Global Warming and help him fight the scam!**

Kindest Regards,

Bob Ashworth
