

Olympic flame folly

Who's worried about carbon emissions then:

http://news.xinhuanet.com/english/2008-04/01/content_7896849.htm

<http://www.junkscience.com/ByTheJunkman/20080410.html>

"The plane for the Beijing 2008 Olympic Torch Relay takes off from the Beijing Capital International Airport in Beijing, China, on April 1, 2008. The Beijing Olympic torch relay officially embarked on its world tour as the chartered Air China plane carrying the holy flame on Tuesday left Beijing for Kazakhstan's Almaty, the first stop of the 137,000 kilometres (85,000 miles) worldwide journey"

And that's not counting the extra emissions due to all the staff attending to the "holy" flame and the motorcades, hotel accommodation etc etc.

CAN YOU NOT SEE THE BULLSHIT IN ALL THIS?? HOLY SHIT – IT'S SKY HIGH!!

Here's another one for all you moronic AGW believers:

Al Gore - the TRUE ANTI-CHRIST or the SECOND HITLER?

<http://www.junkscience.com/ByTheJunkman/20080403.html>

<http://www.spiegel.de/international/world/0,1518,546551,00.html>

<http://www.washingtontimes.com/apps/pbcs.dll/article?AID=/20080410/FOREIGN/401836215/1001>

"Just last week, the UN's World Food Programme launched an "extraordinary emergency appeal" for donations of at least \$500 million in the next four weeks to avoid rationing food aid in response to the spiralling cost of food -- a problem brought about in part by Gore's climate alarmism, which helped spur the lurch to biofuels like corn-based ethanol.

British billionaire Richard Branson, for example, credits Gore for pushing him to make a \$3 billion pledge in 2006 to replace fossil fuels with biofuels. While campaigning in 2006 for Democratic senatorial candidate Amy Klobuchar, Gore asked, "What is so complicated about choosing fuel that comes from Minnesota farmers rather than from the Middle East?" while simultaneously asserting that Klobuchar would "provide leadership in the fight against global warming."

So, Al Gore, rather than wasting \$300 million on a public relations campaign to promote an unrealistic and impractical approach to the dubious problem of manmade climate change, why not donate that money to the UN and help prevent real people from starving today?"

Does gory Gore give a **SHIT** about global warming? **YOU** decide.

Remember Germany in 1939? Streets lined with moronic crowds, arms held high saluting their leader? Today's equally moronic governments across the world salute the UN IPCC and Al Gore.

BE SCARED – BE VERY SCARED INDEED!! YOU HAVE BEEN WARNED.

REMEMBER THIS AT ALL TIMES:

CARBON DIOXIDE HAS NEVER, *WILL NEVER*, INFLUENCE THE CLIMATE.
THE CLIMATE DRIVES CARBON DIOXIDE, VIA THE OCEANS THAT COVER 70% OF OUR PLANET.
MAN'S EMISSIONS ARE LESS INFLUENTIAL THAN A FART IN A THUNDERSTORM.

Human sources of greenhouse gases would be as follows, based on average farts from an average person:

6,600,000,000 people in the world

3,300,000,000 litres per day of total anal gas emissions

231,000,000 litres of methane at 7%

297,000,000 litres of CO2 at 9%

528,000,000 litres of greenhouse gases per day, equivalent to

190,080,000,000 litres of anal greenhouse gases per year - and that does NOT influence the climate, OK?!

If it did, well, you know what to do, don't you?!
